

SDS Max Masonry Drill Bits

SINGLE TIPPED (12-15mm) - Armeg's proven single tip design, combined with twin flutes, provides rapid penetration and a very cost effective method of producing larger diameter holes. Reduced flute lengths on select diameters are ideal for fixings applications where machine power is transmitted in the most efficient manner to maximise drilling performance.

CROSS HEAD (16-40mm) - Patent protected, cross head design hammer drills provide a combination of smoother drilling and prolonged life to give users outstanding performance. Design features, such as co-planer faceting and deep clearways, maximise spoil removal. Four carbide cutting edges rapidly penetrate the hardest of masonry materials with a smoother action and a prolonged life expectancy with high penetration rates.

PRODUCT GROUP: A2
