

SDS Series

A range of innovative accessories for use in most SDS type drilling machines. Chuck adaptors provide a quick and easy method of enabling a traditional 3 jaw chuck to be used in an SDS machine with hammer stop facility. A ½ inch adaptor with ¼ inch internal hexagon allows an SDS machine to be quickly converted to accept screw driver bits, a fast change from drilling to screw driving. Socket drivers also provide the instant switch from drilling to driving home of coach bolts, etc. Quality forged points and chisels.
